LOCATION OF CONTROLS AND COMPONENTS

• Automatic Stop

When the tape comes to its end during playback (or recording), the tape stops moving automatically, the Play (and Record) Button returns to its original position, and the power source is turned off.

TO ATTACH HANDSTRAP

■ Cue and Review

If, during tape playback, the Fast Forward/Cue Button (or the Rewind/Review Button) is partially pressed, the tape will be moved rapidly forward (or rewound) and the tape sound can be heard (although garbled) from the speaker as long as the button is partially pressed. When the button is pushed further, the playback sound may no longer be heard.

Service Notes for the Supply Reel Table (M67) and Reel Table Gear-L (M68)

The supply reel table and reel table gear-L sandwiches the main base plate as shown in Figure A. When replacing them, pull hard on the part(s) to be replaced.

When assembling, refer to Figure A, and push the supply reel table and reel table gear-L with your fingers. Assemble so that the distance from the main base plate to the top of the supply reel table is 12.0mm when the supply reel table is lifted.
